Name

Part Four Activity

1.	What are some instances or circumstances where you believe the US should
	use military force? (I know this is a loaded questions, but I looking for
	probably 5-10 different scenarios)

2. We spend roughly \$750 billon a year on defense. Do you think that should be cut, stay the same, or increase? Why?

3. If you had to cut billions of dollars from the defense budget, what would you cut and why?

4. What are some advantages of having a greater US presence around the world?

5.	What are some possible consequences of having a stronger US presence around the world?
6.	What are some advantages of decreasing our US presence around the world?
7.	What are some possible consequences of decreasing our US presence around the world?
8.	Since terrorists and terrorism do not belong to a single nation, how do we reduce the likelihood of terrorist attacks at home and overseas at our embassies, military bases, etc?
