

### **States Rights vs. Federal Rights Assignment**

Your assignment is to write a 3/4 page essay (either hand written or typed) on your opinion to the following problem. You may find it helpful to use page 83 in your book.

Let's say that the state of Minnesota would like to build a youth center in Melrose complete with a movie theater, pool tables, video games, and many other fun things that kids would want to do. The state is going to pay for everything and everything is free for kids. The state feels that this will be a great thing for this area and is excited to build this youth center in Melrose. However right before they were going to build, the national government from Washington DC said that the state of Minnesota could not build this because they would be building on a wildlife area. The federal government wants this wildlife area untouched and there is no other place in Melrose to build. Who do you think should have the final decision? Should it be the state of Minnesota or the national government? Explain.
